# Scoparina

Each fluid dram represents the active principles of 15 grains each of Broom Top, Couch Grass and Hydrangea, combined with Benzo-Salicylate of Lithium.

**Properties**—Diuretic and Diaphoretic.

Being highly esteemed for its demulcent and emollient qualities in cystitis and irritable bladder, acting both on the bowels and kidneys.

Dose 1 to 2 teaspoonfuls three times a day. It is best given in half a glass of hot water.

It is true that many chronic diseases are caused by imperfect digestion and disordered metabolism, which is shown by an abnormal condition of the urine, with neuralgia pains in various parts of the body, and a derangement of function in many organs and tissues. A remedy, or combination of remedies, for the relief of these lesions is the daily demand by the busy practitioner, and Scoparina is presented with confidence that it will not disappoint the physician when prescribed in these cases.

In the treatment of diseases dependent on the uric acid diathesis Scoparina will be found an efficient remedy. It improves the appetite and invigorates the whole system. It increases the functional activity of the kidneys and prevents formation of urinary deposits. It relieves irritation of the bladder and chronic cystitis. It may be given with advantage in chronic bronchitis, in chronic lung disease with hydrothorax, and it stimulates the kidneys in all forms of chronic dropsies. In all cases of impaired power of the heart, with diminished secretion of urine. In palpitation without organic disease of the heart. In irritation of the bladder and incontinence of urine of elderly people.

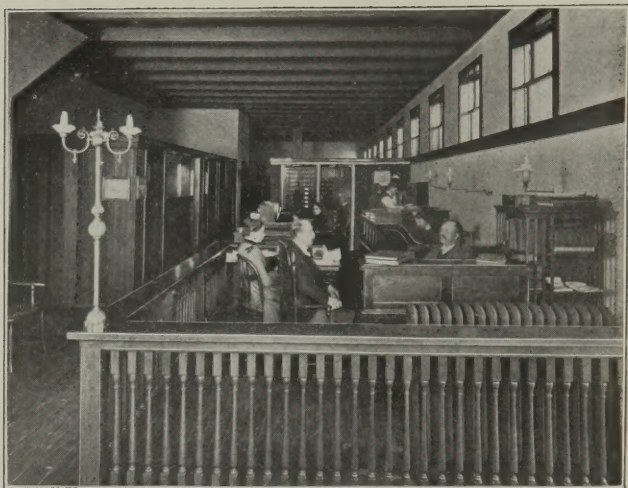

It is a specific for the prompt relief of frequent micturation with pressing pains and irritation.

Its use will be found a valuable aid in the treatment of renal calculus, gout and chronic rheumatism.

Put up in 16 oz. bottles, per doz. \$12.00.

MANUFACTURING CHEMISTS

181 to 189 Chestnut Street, corner North Franklin

CHICAGO

Cordially invite you and your friends to inspect their new Laboratory. It is for many reasons very interesting and instructive. The building was built and is owned by Messrs. Stearns & White. It is heavy mill construction, pressed brick, five stories and basement high. It faces the South, East and West, and has daylight in every part. Its equipment is modern and original. The floors are extra heavy, consisting of dressed heavy plank finished on the top with hard maple. No joists are used, only heavy Georgia pine timbers. The basement and sidewalks are of Portland cement, and elevators and stairways are fire-proof. The first floor is finished in polished oak. House telephones connect every floor. The building has its own power and heating plant and is complete in every detail.

The original copyrighted number system alone is well worth a visit. It is the only mercantile building in which anyone can easily find anything. Each thing has its place, which is numbered, with the name following. In the basement 1 to 1000; first floor, 1000 to 2000; second floor, 2000 to 3000; third floor, 3000 to 4000; fourth floor, 4000 to 5000, and fifth floor, 5000 to 6000. Every item made is ordered by the Number in the price list, which not only makes sure of the item but locates the stock and affords a check in filling by number and name and a verification then and there by name and number, rendering errors and omissions practically impossible.

Each label has its separate drawer which is L, and the same number as the goods. Each Electrotpe that label is printed from is marked E, and the goods number. On each formula card which is always used in making the article appears the letter C, and the goods number. Everything used in making and packing, also stationery, is marked O, and its number. All Fixtures are F, and their number, thus not only shelvings and tables but tools have their marked space, completely fulfilling the old adage: "a place for everything and everything in its place."

Reserved stock is in any one of a numbered reserved space, and this number is placed in the original space number, which prevents a larger stock than is usually carried blocking the system. All things must come back to their places, because there is none other for them. No time is wasted in hunting for anything.

The equipment is original, modern and complete. The ends of all shelving only touch the wall, each being clean and light, holding four hundred gallons of liquids. All employees are taught to feel their responsibility and to obey their better selves. Soon out, or a permanent place, is the rule. No "lay-offs" or discharges without a cause have ever occurred. We feel our success is largely due to those with us.

We want to show you a clean laboratory. How drugs are ground, Specialties made, Fluid Extracts percolated, assayed and tested. Solid and Powdered Extracts finished. Elixirs and Syrups compounded and filtered. How Suppositories are made by the thousand by cold pressure with our own designed machine. How tablets are triturated, granulated, dried and compressed by the million with single, double, triple and quadruple tablet machines. How they are coated and polished. How Hypodermic Tablets are molded. How Pills are made.

We want you to become acquainted with us and those in charge of our different departments, that you may feel confident that all goods are properly made.

Positively only the best goods from the purest materials, absolutely true to formula, are made. The prices the goods are sold for are never considered in any of the manufacturing departments. To produce the best is always understood. We never cut a quality for price. All materials are bought for Cash and paid for inside of ten days. No money has ever been borrowed. All employed are temperate, pains-taking and skilled in their departments. Prices, quality considered, are the lowest.

**References:** First National Bank. Any jobber. Any Commercial Agency.

Have your name on our mailing list.

Send postal and we will call upon you.

Ask for samples and literature.

Telephone, North 232

You can reach our laboratory by the Wells street car in nine minutes from down town. Get off at Chestnut street, go West one-half block.

The quicker way is to take the Northwestern Elevated to Chicago avenue station and go North two short blocks.

## To the Buyer

To best serve our customers we offer our untiring energies to give goods of the very best quality at prices always the lowest.

On all orders of over \$10.00 for our own manufactured goods we allow freight, except when it exceeds 10 per cent. Then 10 per cent. is allowed.

Boxing and cartage free, but we do not allow cartage at destination.

Mail orders solicited, which will receive prompt and careful attention.

Always specify "S. & W." when ordering of Jobbers. Special and private formulas prepared with care, strictly as represented, and guarded from publicity.

All prices subject to market changes.

Terms 60 days on approved credit, or 2 per cent. discount for cash within 10 days.

Pay no money on our account to parties representing us without our written authority.

*9th Edition*

SPECIALTIES

Manufactured only by STEARNS & WHITE CO.

*net except in quantities,*

PART ONE—NET PRICES.

PART ONE — NET PRICES.

1001 Alkacetamid	.....				\$0 40
A compound, alkaline, coal tar derivative. Indicated in all conditions calling for antipyretic or febrifuge effects. Anodyne and sedative in cases in which Bromides, Caffein, etc., have failed. Nervine in Neuralgic and Rheumatic pains, replacing Aconite, Salicylic acid and pain removers. Hypnotic and sedative in Insomnia, Delirium, etc. Thoroughly harmless—no heart effects. Average dose 5 to 10 grains.					
				Per doz. pts.	
1002 Albu-Ferri Comp	.....				\$8 00
This preparation is recommended in all cases of Anæmia and Neurasthenia. In the anæmia of Phthisis and of Scrofula it is without a peer. All Neurasthenic conditions are benefited by its use. It being nearly non-saccharine, there are none of the objections to its use which pertain to the usual syrup form in which the Albuminate of Iron is usually exhibited. It is the most easily assimilated of all Iron preparations, correcting the ill-effects following mal-nutrition. Each fluid dram contains 1 grain each of Albuminate of Iron, Hypophosphite of Lime and Soda, $\frac{1}{2}$ grain Hypophosphite Potash. Dose 1 to 2 teaspoonfuls.					
				12 oz.	
		Gal.	Pints.		Per doz.
1022 Benzomol	.....	\$3 00	\$0 50		\$4 00
(See third page of cover)					
1003 Epidermine Ointment.					
Composed of Zinc Oxide, Boracic Acid, Eucalyptol and Vaseline qs.					
Will be found very efficient in the treatment of all skin diseases, and unexcelled as a dressing for wounds, sores, cuts, bruises, etc., because of its powerful antiseptic and healing properties.					
	$\frac{1}{2}$ lb.	\$0 40	1 lb.	\$0 75	5 lb. \$3 00
1004 Epidermine Lotion.					
A preparation of great value in the treatment of Eczema and kindred skin diseases.					
	Pints, each \$1 00.				
		Gal.	5 Pints.	Pints.	
1005 Essence of Pepsin, S. & W.	.....	\$4 75	\$3 50		\$0 80
1006 Ext. Sawpalmetto and Sandalwood	.....	4 00	2 75		65
Each fluid dram represents					
Sawpalmetto.....20 grs.					
Sandalwood.....qs.					
1007 Expectorant, S. & W. No. 4.	.....	3 50	2 50		65
Formula—Each teaspoonful contains					
Tinct. Sanguinaria, M. $1\frac{1}{2}$		Tinct. Lobelia, M. $1\frac{1}{2}$ .			
Tinct. Opii, M. $\frac{1}{2}$		Chloroform, M. $\frac{1}{2}$ .			
Benzomol, S. & W., M. 10		Tar Water Saturated, M. 23 $\frac{1}{4}$ .			
Honey, M. 23 $\frac{1}{4}$ .					
Expectorant S. & W. No. 4 is a valuable remedy in the treatment of diseases of the throat and lungs, being mild, yet efficient. With the addition of Benzomol it is valuable as an antiputrescent. It relieves the mucous secreted by the inflamed lining membrane of the bronchial tubes, it cleanses the throat and mouth, leaving the parts affected in an excellent condition, different from most expectorants. The dose is from 15 to 60 minims. It may be given in small doses often, just sufficient to keep the throat moist.					
		Gal.	5 Pts.	Pts.	
1023 Elixir Halogens Comp.	(See page 6.).....	\$4 50	\$3 50		\$0 75
1008 Elixir Pancreo-Digestin.					
Each fluid dram contains					
Pancreo Digestin.....10 grs.					
	Gal., \$4 50	5 Pints, \$3 50	1 Pint, \$0 75		
1009 Elixir Pancreo-Digestin.					
Gentian and Chloride Iron.					
Each fluid dram contains					
Pancreo Digestin.....5 grs.					
With Elixir Gentian and Iron Chloride.					
	Gal., \$4 50	5 Pirts, \$3 50	1 Pint, \$0 75

| A mineral oil of absolute purity. It does not saponify. It is colorless, odorless and tasteless. Recommended by eye, ear, nose and throat specialists as a perfect emollient, being absolutely non-irritant. It is especially recommended for use in an atomizer, both alone and as a vehicle. Also for operations on the eye and ear. It will not become rancid, and is subject to no change, under the action of either acid or alkali. Can be used with absolute safety in the treatment of Bronchitis, Asthma, Hay-fever, Influenza, Catarrh or other diseased conditions of the air-passages. |                |                  |                                     |

Menthol.....	20 parts.	
Camphor.....	20 parts.	
Terrole qs.....	1000 parts.	
Used as an antiseptic in ulcerated conditions of the air passages, and to prevent offensive and profuse secretions.		
1021 R C.....		60
Eucalyptol .....	30 parts.	
Terrebene.....	30 parts.	
Menthol.....	5 parts	
Terrole qs .....	1000 parts.	
Used in the treatment of irritating diseases of the mucous membrane of the bronchial tube.		

## 1023 Elixir Halogens Compound.

Each fluid dram contains 9 grains of combined Iodides, Bromides, and Chlorides of Calcium, Magnesium, Sodium, Potassium and Iron, with Compound Ext. Sarsaparilla, with suitable aromatics.

**Properties and Uses.**—A powerful and effective alterative. Extensively used in diseases of the blood, traceable to scrofulous origin. Also used in Erysipelas, Salt Rheum, Cancerous tumors, Cutaneous affections and in Rheumatism and Neuralgia.

**Dose for Adults.**—One teaspoonful in a little water an hour before each meal, which may be increased under the directions of a physician.

It is a peculiar fact that most chronic diseases are due to disorders of the secondary assimilation where the digested food does not produce good blood and normal tissue, as in scrofula, tuberculosis and rachitis. In these constitutions we find in infants an arrest of development, as manifested by difficult dentition, imperfect ossification, delay in the power of walking, glandular swellings, ophthalmia, otitis, eczema, with indigestion, flatulency, acidity, irregular state of the bowels, and torpid liver. We have a constitutional condition, with an excess of the white and diminution of the red tissue, the blood is albuminous, the proportion of fibrine and red globules small, the muscles weak and flabby, symptoms indicating a weakened state of the vital forces. In the adult we may have, from tuberculosis or syphilis, similar evidence of disorder in blood making and tissue building.

It is found as a matter of practical experience that in the halogen group of agents, as well as in certain vegetable alteratives, we have the only remedies which have a certain curative power in these cases, and especially in the initial stage.

This preparation is a scientific combination of the most powerful alteratives, and when given with due regard to such hygienic means as good food, air and sunlight, will be found a certain means of warding off and will be found a prophylactic in most dangerous and fatal maladies.

It may be given in all disorders of nutrition, in incipient tuberculosis and chronic syphilis, in all cases where adventitious deposits are present.

In rheumatism, dropsy, various lesions of the lungs resembling consumption. In diseases attended with glandular swellings, scrofulous ophthalmia, fistulous and carious ulcers, abscesses, noli me tangere, hip disease, diseases of the bones, ozena, distortions of the spine, in indigestion and enlargements of the parts diseased, many affections of the glands, tubercular deposits and deposits of coagulable lymph, visceral and glandular congestions, inflammation, enlargements, adhesions, exudations, thickening of membranes, morbid growths, uterine tumors, and ovarian and uterine enlargements.

In chronic inflammation, induration and enlargement of the liver and enlarged spleen—chronic enlargement and induration of the prostate, parotid, lymphatic and mesenteric glands and chronic tumors of the mammary glands.

In syphilis with ulceration of the throat, periostitis, ulcers of the skin, buboes, paralysis and chronic nervous affections.

In lupus, eczema, lichen, pompholyx, prurigo, pityriasis, psoriasis, in impetigo, ecthyma, prurigo, lepra.

In phlegmonous erysipelas and sloughing of the cellular membrane, and in all cachetic and depraved states of the system.

## SPECIALTIES.

**Syrup Alkachin or Tasteless Quinine** ..... Gal. 5 Pints. Pint.  
 \$4 00 \$2 75 \$0 65  
 Each fluid dram is equal to 2 grains of Sulphate Quinine. Shake well before using.

**Dose.**—From one-half to two teaspoonfuls, according to age. Each dose may be followed by water to prevent any bitter taste of Quinine that might be developed if allowed to remain in the mouth too long. Avoid the use of any acid, as it will develop a bitter taste.

May be used for all the purposes that are met by quinine as a tonic nerve stimulant, and to counteract malarial toxæmia. It will not irritate the stomach or cause dizziness or other symptoms of brain irritation. In malarial fevers it may be given together with three grain doses of prussiate of iron. And where nervous symptoms predominate, add five drops of gelsemium to each dose. This prescription may be given in all cases of congestive, bilious or typhoid fevers where the disease is, in the least degree, of a periodical character. In the disorders of pregnancy, and especially during the latter months, give it with five drops doses of caulophyllum three times a day. In spasmodic asthma combine with lobelia so as to produce slight nausea. In whooping cough, laryngismus stridulus, palpitations of the heart and hiccough give with ten grain doses of chloral hydrate, where the attacks are periodical. It may be substituted for quinine as a tonic in diphtheria asthenic, pneumonia and hectic fever with exhaustive sweats, and in the debility accompanying serofulous abscesses and chronic ulcers. In cases of profuse expectoration, in debility following hemorrhage, in chronic diarrhœa, in albuminuria following scarlet fever, and in all cases of chronic mucous discharges. In case of prevailing epidemics give it with Fowler's solution in five drop doses as a prophylactic. In diabetes, chronic diarrhœa, leucorrhœa, menorrhagia, passive hemorrhage and passive dropsies. In adynamic fevers, in scarlatina maligna, gangrenous erysipelas and where there is gangrene and putrescency. In anomalous conditions characterized by periodicity, as headache, hemicrania, neuralgia, toothache, rheumatism, deafness, dyspnœa and convulsions. In neuralgia of the facial nerves add five drops of gelsemium to each dose. In browague or supra-orbital neuralgia it may be combined with Fowler's solution in doses of five drops of the latter.

**1026 Emulsion Castor Oil**, as suggested by E. J. Farnum, M. D.

Each fluid ounce represents:

Castor Oil, Cold Pressed.....  $\frac{1}{2}$  fl. oz  
 Oil Turpentine, redistilled... 10 m.  
 Oil Wintergreen..... 5 m.  
 Aromatics..... qs.

**Dose.**—One-half to one tablespoonful as required.

Gal., \$3 50. 5 Pints, \$2 50. 1 Pint, \$0 60.

**1027 Depilatory**, for removing superfluous hair, to be used before operating.

Is harmless, and will not discolor or injure the most sensitive or delicate skin. It never fails, and has no equal.

**Directions.**—Apply the Depilatory lightly with a small stick. Let it remain three minutes. Rub lightly until the hair is all dissolved, then wash off. 1 oz bottle, 50 cents each.

**1028 Haines Sugar Test.**

**Directions for use.**—Place two drams of Haines Test solution into a clean test-tube and heat to boiling point. Boil for one minute, if no reduction of copper takes place, introduce 4 or 5 drops of the suspected urine and boil again, continuing to add urine until 8 or 10 drops have been added, boiling after each addition. If no reduction occurs, an appreciable amount of sugar is not present. 4 oz bottles, 25 cents each.

**1030 Neutralizing Cordial Improved**..... Gal. 5 Pints. Pint.  
 \$3 50 \$2 50 \$0 60

Rhubarb, select fresh, Cinnamon Ceylon, Soda Bicarb., Potass. Carbonate, Peppermint. Especially manipulated to fill exacting demands, securing the best therapeutic action of the constituents.

**1031 Ironwood Tonic**..... Gal. 5 Pints. Pint.  
 \$3 50 \$2 50 \$0 60

Tinct. Nux Vomica.....  $1\frac{1}{2}$  m.  
 Tinct. Galangal.....  $2\frac{1}{2}$  m.

	Juniper Berries..... 1½ grs.			
	Potassium Acetate..... 5 grs.			
2023	<b>Buchu and Pareira Brava</b> .....	4 50	3 25	9 00
	Each fluid dram represents			
	Buchu..... 15 grs.			
	Pareira Brava..... 15 grs.			
2029	<b>Buckthorn Bark</b> .....	4 50	3 25	9 00
	Each fluid dram represents			
	Buckthorn Bark..... 15 grs.			
2030	<b>Buckthorn Comp</b> .....	5 00	3 50	9 60
	Each fluid dram represents			
	Buckthorn..... 8 grs.			
	Senna..... 4 grs.			
	Mandrake..... 1 gr.			
	Rochelle Salts..... 5 grs.			
2031	<b>Caffeine Citrate</b> .....	6 00	4 00	10 80
	Each fluid dram contains			
	Caffeine Citrate..... 1 gr.			
2032	<b>Calcium Iodide</b> .....	6 80	4 50	12 00
	Each fluid dram contains			
	Calcium Iodide..... 1 gr.			
3352	<b>Calisaya Bark</b> .....	4 00	2 80	7 50
	Each fluid dram represents			
	True Calisaya Bark..... 5 grs.			
2033	<b>Calisaya Bark and Bismuth</b> .....	4 00	2 80	7 50
	Each fluid dram represents			
	True Calisaya Bark..... 5 grs.			
	Bismuth Citrate..... 1 gr.			

## MEDICINAL ELIXIRS.

	Per. gal.	Per five Pints. Including Bottles.	Per doz. Pints
2034 <b>Calisaya Bark, Bismuth and Strychnine</b> .....	\$4 50	\$3 25	\$9 00
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Bismuth Citrate.....	1 gr.		
Strychnine.....	1-60 gr.		
2035 <b>Calisaya Bark, Detannated</b> .....	4 30	3 00	8 40
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
2036 <b>Calisaya Bark and Iron</b> . . . . .	4 00	2 75	7 50
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	2 grs.		
2037 <b>Calisaya Bark and Iron Lactate</b> .....	5 00	3 50	9 60
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Lactate.....	1 gr.		
2038 <b>Calisaya Bark, Iron and Bismuth</b> .....	4 00	2 75	7 50
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Bismuth Citrate.....	1 gr.		
2039 <b>Calisaya Bark, Iron, Bismuth and Pepsin</b> .....	7 00	4 50	12 00
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Bismuth Citrate.....	1 gr.		
Pepsin.....	5 grs.		
2040 <b>Calisaya Bark, Iron, Bismuth, Pepsin and Strychnine</b> . . . . .	7 00	4 50	12 00
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Bismuth Citrate.....	1 gr.		
Pepsin.....	5 grs.		
Strychnine.....	1-60 gr.		
2041 <b>Calisaya Bark, Iron, Bismuth and Strychnine</b> ..	4 50	3 25	9 00
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Bismuth Citrate.....	1 gr.		
Strychnine.....	1-60 gr.		
2042 <b>Calisaya Bark, Iron and Pepsin</b> .....	6 00	4 00	10 80
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Pepsin.....	5 grs.		
2043 <b>Calisaya Bark, Iron and Phosphorus</b> .....	4 50	3 25	9 00
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Phosphorus.....	1-50 gr.		
3353 <b>Calisaya Bark, Iron and Strychnine</b> .....	4 00	2 80	7 50
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	2 grs.		
Strychnine.....	1-50 gr.		
2044 <b>Calisaya Bark, Iron, Strychnine and Pepsin</b> ....	5 00	3 50	9 60
Each fluid dram represents			
True Calisaya Bark . . . . .	5 grs.		
Iron Pyrophosphate.....	1 gr.		
Strychnine.....	1-60 gr.		
Pepsin.....	5 grs.		
2045 <b>Calisaya Bark, Pepsin and Bismuth</b> . . . . .	6 00	4 00	10 80
Each fluid dram represents			
True Calisaya Bark.....	5 grs.		
Pepsin.....	5 grs.		
Bismuth Citrate.....	1 gr.		

MEDICINAL ELIXIRS.		Per gal.	Per five pints. Including Bottles.	Per doz. pints.
2046	<b>Calisaya Bark, Pepsin, Bismuth and Strychnine</b> \$6 00	\$1 00	\$10 80	
	Each fluid dram represents			
	True Calisaya Bark . . . . . 5 grs.			
	Pepsin . . . . . 5 grs.			
	Bismuth Citrate . . . . . 1 gr.			
	Strychnine . . . . . 1-60 gr.			
3354	<b>Cascara Sagrada</b> . . . . . 4 50	3 25	9 00	
3355	<b>Cascara Laxative</b> . . . . . 4 50	3 25	9 00	
	Each fluid dram represents			
	Cascara Sagrada . . . . . 5 grs.			
	Berberis Aquifolium . . . . . 2½ grs.

	Quinine Sulphate..... ½ gr.			
	Arsenic..... 1-32 gr.			
2077	<b>Iron Pyrophosphate and Strychnine</b> .....	4 50	3 25	9 00
	Each fluid dram contains			
	Iron Pyrophosphate..... 1 gr.			
	Strychnine..... 1-60 gr.			
3362½	<b>Iron and Manganese Peptonates</b> .....	6 00	4 00	11 00
	Each fluid oz. represents			
	Iron Metallic ..... 1½ grs.			
	Manganese Metallic..... ½ gr.			
2078	<b>Iron and Quinine Phosphates</b> .....	4 75	3 50	9 75
	Each fluid dram contains			
	Iron Phosphate..... 2 grs.			
	Quinine Phosphate..... 1 gr.			

## MEDICINAL ELIXIRS.

	Per gal.	Per five pints. Including Bottles.	Per doz. pints
<b>3363 Iron, Quinine and Strychnine Phosphates</b> . . . . .	\$4 75	\$3 50	\$9 75
Each fluid dram contains			
Iron Phosphate . . . . .	1 gr.		
Quinine Phosphate . . . . .	$\frac{1}{2}$ gr.		
Strychnine Phosphate . . . . .	1-60 gr.		
<b>3364 Iron and True Salicylic Acid</b> . . . . .	4 75	3 50	9 75
Each fluid dram represents			
True Salicylic Acid from Oil			
Wintergreen . . . . .	5 grs.		
Tinct. Chloride Iron . . . . .	5 min.		
<b>2079 Iron Tincture, Muriate</b> (tasteless) . . . . .	4 00	2 75	7 50
Each fluid dram represents			
Tinct. Muriate Iron . . . . .	10 min.		
<b>3375 Kola Compound</b> . . . . .	4 50	3 25	9 00
Each fluid dram contains			
Kola . . . . .	5 grs.		
Coca . . . . .	5 grs.		
Celery . . . . .	5 grs.		
<b>3365 Laxative Comp., Improved</b> . . . . .	4 75	3 50	9 75
Each fluid dram represents			
Cascara Sagrada Bark . . . . .	6 grs.		
Butternut Bark . . . . .	4 grs.		
Senna . . . . .	4 grs.		
Licorice Root . . . . .	1 gr.		
Cardamom . . . . .	1 gr.		
Rochelle Salts . . . . .	4 grs.		
Anise . . . . .	1 gr.		
<b>2080 Licorice Aromatic, or Quinine Elixir</b> . . . . .	3 65	2 50	7 00
A vehicle for Quinine and other bitter or nauseating remedies			
<b>3378 Lime Juice and Pepsin</b> . . . . .	4 30	3 00	8 40
<b>2081 Lithium Citrate</b> . . . . .	7 50	5 00	13 50
Each fluid dram contains			
Lithium Citrate . . . . .	2 grs.		
<b>2082 Mandrake Comp., Alkaline</b> . . . . .	4 50	3 25	9 00
Each fluid dram represents			
Mandrake . . . . .	1 $\frac{1}{2}$ grs.		
Jalap . . . . .	1 $\frac{1}{2}$ grs.		
Senna . . . . .	1 $\frac{1}{2}$ grs.		
With Potassium Carbonate 1 $\frac{1}{2}$ grs. and Aromatics.			
<b>2083 Matico Comp.</b> . . . . .	4 50	3 25	9 00
Each fluid dram represents			
Matico . . . . .	10 grs.		
Cubeb . . . . .	6 grs.		
Buchu . . . . .	6 grs.		
<b>2084 Pancreatin</b> . . . . .	5 50	3 75	10 20
Each fluid dram contains			
Pancreatin . . . . .	1 gr.		
<b>2085 Pepsin</b> . . . . .	5 00	3 50	9 60
Each fluid dram contains			
Pepsin . . . . .	5 grs.		
<b>3376 Pepsin, Bismuth and Strychnine</b> . . . . .	7 00	4 50	12 00
Each fluid dram contains			
Pepsin . . . . .	5 grs.		
Bismuth Citrate . . . . .	1 gr.		
Strychnine . . . . .	1-60 gr.		
<b>3367 Pepsin and Bismuth</b> . . . . .	6 00	4 00	11 00
Each fluid dram contains			
Pepsin . . . . .	5 grs.		
Bismuth Citrate . . . . .	1 gr.		
<b>2086 Pepsin, Bismuth and Ginger</b> . . . . .	6 00	4 00	11 00
Each fluid dram contains			
Pepsin . . . . .	5 grs.		
Bismuth Citrate . . . . .	1 gr.		
Tr. Ginger . . . . .	2 min.

<b>2114 Wahoo</b>	.....	4 75	3 50	9 75
Each fluid dram represents				
Wahoo Root Bark.....10 grs.				
Aromatics.				

## ERRORS, SHORTAGES, BREAKAGES, OVERCHARGES, ETC.

We are often asked to explain why we are so free from errors, shortages, overcharges, breakages and other unsatisfactory annoyances that usually occur in business. We use original, copyrighted systems, double checking THEN AND THERE all work. Everything in our building has its fixed and numbered place. All orders are filled by checking the number and name and verifying by name and number, and are then doubly inspected. Shortages are avoided by double checking, and small packages are put in bags marked "Do not overlook in unpacking." Overcharges do not often occur because each customer is given a "Case File," which shows State, Town, Name, Business, Address, Date, Salesman, Credit, Average, How Often, Population, Ledger Page, Price Lists Sent, Samples Sent, Advertising Sent, Letters, Calls, Responds, Specialties Sold, Railroad, Complaints, Remarks, Special Formulas, Prices Quoted, Prices Charged. His case and wants are thoroughly understood and filled. We are exacting in having all checks thinking ones, and insisting upon perfect work. We have many visits from those in this and other lines, inspecting our advanced systems, who compliment them highly.

WRAPPING ROOM.

TABLET ORDER ROOM.

## MEDICINAL SYRUPS

We sell all syrups by measure instead of by weight, as is the usual custom. Each gallon package will contain about ten pounds of syrup, or one and one-quarter pounds to the pint. Special prices given in five-gallon lots or over.

Subject to <sup>400%</sup>~~100%~~ Discount.

Licorice.....	5 grs.		
Cubeb.....	1 gr.		
Tar.....	$\frac{1}{2}$ gr.		
Ammonium Bromide.....	1 gr.		

## SPECIFIC TINCTURES

To fill the demand for a preparation made from the fresh green plant with a stronger alcoholic menstrum preserving all the medical properties of the fresh plant we have after several years of careful study and experiments perfected and added to our list the following which we call Specific Tinctures. We feel that they are superior to most Specific Tinctures, Mother Tinctures, etc., now offered. The plants from which they are made are carefully gathered at the proper age of their growth. These are packed in alcohol as soon as gathered and sent to our laboratory, there most carefully prepared, macerated and expressed and made a definite strength. That this line of goods will not be mistaken for any other of ours or another's make they are called and labeled Specific Tinctures.

FLY PAPER.

1145 Instantaneous Poison Fly Paper, Sheets 14x18 inches. Per ream..	\$3 00
1146 Instantaneous Poison Fly Paper, Envelopes. Per box of 50 envelopes.....	50

Each envelope contains 8 pieces, 4½x7 inches, of the Poison Fly Paper. The body of the envelope is printed a rich red color, the large cut of the fly and lettering being white. Fifty of these envelopes are packed in a neat, red colored, glazed, pasteboard box, making a VERY ATTRACTIVE package to retail. All of our Poison Fly Paper kills plenty of flies. It does it quickly. They usually die on or near the plate. It is so heavily poisoned that one sheet can be used again and again, and will humanely kill many thousand flies.

In selling Poison Fly Paper druggists should say to their customers: "Use only enough water to wet the paper, not float it. Sweeten well with sugar." Some users seem to expect a little fly to drink several hundred times its weight of water to get at the sweetening in and on the paper.

## Granular Effervescent Salts.

 $\frac{1}{2}$  lb bot.  
per doz.1 lb  
bots.

- 2334A G. E. Saline Aperient**,.....\$1 00 \$1 00  
(Siedlitz Salt with chemically pure Phosphate Sodium and Magnesium Sulphate.)  
Anti-acid, Anti-ferment, Refrigerant, Laxative or Cathartic, according to dose.
- 2335 G. E. Caffeine, Hydrobromate**..... 3 00 60  
This salt is found to be of great value because of its prompt action in relieving sick headache, mental and physical fatigue. In nervousness, due to alcoholism, and debility, due to excesses of any nature, its true value cannot be over-estimated. It makes a cool, delightful and refreshing drink. Take one dessert spoonful in a small glass of water.
- 2336 G. E. Carlsbad Salt** ..... 3 00 60  
A dessert spoonful of this salt in half a glass of water makes an exceedingly agreeable and healthful drink, representing an equal volume of Carlsbad Water (Sprudel) in all its essential elements.
- 2337 G. E. Magnesia Citrate** ..... 3 00 60  
This salt is a pleasant and very efficient preparation and has many advantages over the liquid form, as it affords a quick and reliable method of preparing a fresh solution of Magnesium Citrate when wanted. As a purgative, two or more tablespoonfuls in a small glass of water, as a laxative one or two tablespoonfuls; drink while effervescing.
- 2338 G. E. Sodium Phosphate**..... 3 20 80  
Each heaping teaspoonful of this salt represents 30 grs of Phosphate of Soda. Its medical properties being so well known therefore needs no description here. From its pure saline taste it is well adapted to the cases of children and of persons of delicate stomach.
- 2339 Granular Effervescent Kissingen Salt** (Rakoczy Springs) 4 00 1 00  
Slightly chalybeate. Its action upon the kidneys and digestive organs, has long rendered it a general favorite.  
A large teaspoonful dissolved in a tumblerful of water, and drank during effervescence, forms an agreeable and refreshing draught, representing an equal volume of Kissingen Water in its essential constituents.
- 2340 Granular Effervescent Vichy Salt** (Grand Grille) 3 00 60  
Vichy Water has been long and favorably known. In cases of hepatic derangement, acidity of the stomach. Gouty or Rheumatic affections, particularly when combined with Lithia, it has proven extremely valuable.  
A large teaspoonful dissolved in a tumblerful of water forms a grateful and refreshing draught, identical with the natural water of the celebrated Grand Grille Springs.
- The modern treatment for obesity is Kissingen one-half hour after each meal one day and Vichy the next. Alternate week after week, until relieved of the discomforts and the dangers of obesity are overcome, after which their use should be discontinued.
- 2341 Granular Effervescent Salt. Magnesium Sulphate.** 3 00 60  
This salt affords a pleasant method of administering Sulphate of Magnesia. As a purgative take two or more tablespoonfuls in a small glass of water and drink while effervescing. As a laxative, one or more tablespoonful taken in the same manner.

# COMPRESSED TABLETS

## AND

# TABLET TRITURATES

Tablet Triturates, Compressed Tablets, Chocolate Coated and Sugar Coated Tablets are all under one alphabetical arrangement to facilitate reference and to enable all to more easily find their wants. Our tablets are all made from materials that have been thoroughly triturated, whether they are compressed or moulded. We believe the minute division of medicinal substances through trituration imposes the action of all therapeutical agents put up in tablet form, and especially where any of the metallic salts enter into the compound these are rendered less irritating and in some instances, perhaps, more active by reason of the large absorbing surface made possible by their minute subdivision.

We have every facility for making perfect goods and in large quantities, at very reasonable prices, for compression from special formulas, and will be pleased at all times to furnish quotations on same in quantities of 3,500 and upwards.

<b>3803A Podophyllin, <math>\frac{1}{2}</math> gr., Chocolate Coated</b> .....	85	45	12
<b>3804 Podophyllin, <math>\frac{1}{2}</math> gr.</b> .....	75	40	11
Minute doses of Podophyllin are used in irritable conditions of the gastro-intestinal tract and as a stimulant in states of functional torpor of the por- tal system.			
<b>3807 Potassium Arsenite, 1-100 gr.</b> .....	50	28	10
Representing Fowler's Solution 1 m.			
<b>3808 Potassium Arsenite, 1-66 gr.</b> .....	50	28	10
Representing Fowler's Solution 2 m.			
<b>3809 Potassium Arsenite, 1-33 gr.</b> .....	55	30	10
Representing Fowler's Solution 3 m.			
Potassium Arsenite, in minute doses, is used in atonic conditions of the nervous and nutritive tissue, stimulating both. Useful in skin diseases with eruptions, imperfect nutrition and glandular deposits, in non-inflammatory diseases of the respiratory and digestive mucous membranes of their nerve supply.			
<b>3810 Potassium and Ammonium Bromide</b> .....	1 00	53	13
Potassium Bromide..... $2\frac{1}{2}$ grs.			
Ammonium Bromide..... $2\frac{1}{2}$ grs.			
<b>3811 Potassium, Ammonium and Sodium Bromide</b> ...	1 50	78	18
Potassium Bromide..... $2\frac{1}{2}$ grs.			
Ammonium Bromide..... $2\frac{1}{2}$ grs.			
Sodium Bromide..... $2\frac{1}{2}$ grs.			
<b>3812 Potassium Bicarbonate, 5 grs.</b> .....	65	35	12
Used in cases of indigestion with excessive formation of acid, constipation, scanty urine, con- taining uric acid, and for the oxidation and ex- cretion of effete matters. One three times a day with a glass of water.			
<b>3813 Potassium Bromide, 5 grs.</b> .....	1 35	70	17
Used as a sedative. Dissolve dose required in water and repeat every hour until its specific effect appear.			

COMPRESSED TABLETS.			
	Per bot. of 1,000	Per bot. of 500	Per bot. of c00
<b>3814 Potassium Chlorate, 5 grs.</b> .....	\$0 50	\$0 28	\$0 10
Used in sore throat. One tablet dissolved on the tongue every two or three hours.			
<b>3815 Potassium Iodide, 5 grs.</b> .....	4 95	2 50	53
Alternative. Dose required three times a day. Tablets to be followed with free use of drinking water.			
<b>3826 Potassium Permanganate, <math>\frac{1}{2}</math> gr.</b> .....	50	28	12
<b>3817 Potassium Permanganate, 1 gr.</b> .....	50	28	12
<b>3818 Potassium Permanganate, 2 grs.</b> .....	55	30	12
Used internally in conditions where increased oxidation seems demanded. Dose, $\frac{1}{2}$ to 2 grs. dissolved in a large amount of water. Used locally in solution as an antiseptic and deodorant.

<b>3861A Strychnine Sulphate</b> , 1-20 gr., Chocolate Coated. ...	90	47	12
Used as a general nerve tonic in cases where exists motor depression or impairment of nutrition of nerve centers.			
<b>3862 Sulphur and Cream Tartar</b> .....	55	30	10
Sulphur..... 2½ grs.			
Cream Tartar..... ½ gr.			
Used as a mild laxative. One to three at night.			
<b>3863 Sulphur Compound</b> (Dr. Q. C. Smith).....	1 05	55	14
Sulphur..... 5 grs.			
Cream Tartar..... 2 grs.			
Ext. Ipecac..... 1-100 gr.			
Ext. Capsicum..... 1-500 gr.			
Acid Arsenous..... 1-1000 gr.			
Calcium Bisulphide..... ½ gr.			
<b>3864 Sun Cholera</b> (Sugar coated only) .....	1 15	60	15
Tr. Opium..... 3 min.			
Tr. Rhei..... 3 min.			
Tr. Capsicum..... 3 min.			
Tr. Ol. Menth. Pip..... 3 min.			
Tr. Camphor..... 3 min.			
Each tablet represents 15 minims of Sun Cholera Mixture.			
For summer diarrhœa and the preliminary diarrhœa of Asiatic Cholera. One to three tablets every two, three or four hours, as necessary.			
<b>3865 Terpin Hydrate</b> , 1 gr. ....	70	38	10
<b>3866 Terpin Hydrate</b> , 3 grs. ....	1 70	83	20
As an expectorant for winter cough. One every two hours.			
<b>3867 Throat</b> .....	1 25	65	16
Potassium Chlorate..... 1 gr.			
Acid Boracic..... ½ gr.			
Soda Benzoate..... ½ gr.			
Oil Gaultheria..... 1-10 m.			
Sugar, q. s. .... 5 grs.			
Used in irritation of the throat and for aphthous ulcerations of the mouth. Dissolve one tablet on tongue every half hour.			
<b>3868 Tonic—Aiken's</b> .....	2 50	1 28	28
Quinine Sulphate..... 1 gr.			
Acid Arsenous..... 1-50 gr.			
Iron by Hydrogen..... ½ gr.			
Strychnine Sulphate..... 1-50 gr.			
Ext. Gentian..... ½ gr.			
<b>3868A Tonic—Aiken's, Chocolate Coated</b> .....	2 70	1 38	30
Used in the treatment of acute malarial toxæmia, and chronic malarial diseases, anæmia, chlorosis, etc. One three times a day after meals.

*Dear Doctors and Druggists:*

It has been a pleasure to us many times each year for the past thirty years to show to our friends the City of Chicago. Knowing a little time well directed will enable one to see more worth the seeing than much more time spent where one is unacquainted, we here print, in a cordial spirit of entertainment—

STEARNS & WHITE CO.'S  
Facts and Sights  
OF  
CHICAGO  
FOR  
Doctors and Druggists.

What to see. How to reach the sights, and time taken from the business district. We feel the information will be interesting, useful and instructive, and that it will be preserved.

CHICAGO

# FACTS OF CHICAGO.

Chicago has 2,569 miles of streets, 4,863 miles of sidewalks, 188 square miles of area, 342 miles of street railroads, 38 miles of elevated railroads, 821 churches, hotels accommodating 150,000 guests, 31 theatres, 34 railroads where 90,000 miles center, factories that pay \$350,000 a day for labor, elevators that receive 242,408,000 bushels of grain a year, lumber yards that receive 1,286,643,000 feet of lumber a year, 47 buildings from ten to twenty stories high, waterworks that pump from 22 miles of tunnels under Lake Michigan 254,208,500 gallons of water per day through 1,692 miles of water mains, a post office that employs 1,319 clerks, 1,096 carriers who handle 800,000,000 pieces of mail a year, 2,200 acres of parks, 67 miles of boulevards, 22 miles of lake frontage, 41 miles of river frontage, where 8,500 vessels load and unload each year, 410 schools with 4,700 teachers and 213,825 scholars.

She has three tunnels under and 54 bridges over the Chicago River, 51,143 street lamps, banks with \$34,474,500 capital and \$186,947,320 deposits, with bank clearings of \$4,413,054,108, fire department with 17,365 hydrants, 1,133 men and 447 horses, 3,250 policemen, 300 acres of stock yards, that receive 7,659,472 hogs, 2,600,476 cattle, and 3,590,655 sheep each year.

With her 516,000 Americans, 94,000 Bohemians, 36,900 Canadians, 46,500 English, 23,000 French, 515,000 Germans 27,000 colored, 261,200 Irish, 24,200 Italians, 48,000 Norwegians, 102,100 Polish, 2,600 Chinese, 24,300 Scotch, 41,000 Russians, 117,000 Swedish, and 4,000 Welsh, she has in all 1,883,000 people.

Chicago burns 1,616,498 tons of hard coal, and 4,790,437 tons of soft coal a year, has 6,300 saloons that average about \$26.50 a day each, or \$60,000,000 a year. It costs \$10.50 a mile to clean the streets \$1,058,496.88 a year for light. The tonnage is 12,965,812. The death rate is 14.4 per 1,000 the lowest of any large city.

Chicago men smoke 800,000 cigars a day, costing \$40,000. The total spent for tobacco each year is about twenty-five millions of dollars.

Her people chew five million sticks of gum a week, two and one half carloads, costing \$50,000. She uses 45,000 dozen eggs each day, consumes 131,000 gallons of milk, each inhabitant taking a little over half a pint. It takes 110,000 pounds of soap a day to keep the city even as clean as she is. She uses four billion pounds of ice each year.

Chicago's debt, including drainage, park and all, is \$45,000,000, or \$27.06 per capita. Borrowing limit, actual value, 1 per cent. Tax rate per \$1,000, actual value, \$11.93—the smallest of any large city.

## HISTORICAL.

Chicago comes from the Indian word meaning wild onion. In 1673, the locality was first visited by Joliet and Marquette. In 1864 it was garrisoned with 60 men, in 1803 Fort Dearborn was erected, destroyed in 1812, rebuilt in 1816, and finally removed in 1857. In 1831 Cook County was settled and the first post office opened. In 1833 it was ceded by 7,000 Indians. In 1833 the town was organized and harbor improvements began. In 1834 the first draw bridge was built, in 1837 the city incorporated 350 people. Rush Medical College was founded in 1840, when the population was 4,170, and public schools were established. In 1850 the population was 28,269 and the first railroad was built and gas supplied. In 1860 the population was 109,206, in 1870 306,605, in 1880, 503,053, in 1890, 1,098,576. Originally the town was from five to twenty-seven feet above the lake but since then has been

raised from six to twelve feet. On October 9th, 1871, fire destroyed three and a half square miles of the city, 17,400 buildings, or \$190,000,000 worth of property, 9,800 persons were made homeless and about 250 lives were lost. The fire started at the corner of DeKoven and Jefferson streets. The 1874, July 14th, fire destroyed sixty acres and \$4,000,000 worth of property. Fort Dearborn was where is now Michigan avenue and River street.

### NORTH SIDE.

**County Jail and Criminal Court Building** is at the corner of Dearborn avenue and Michigan street, two blocks north of the river. It is the finest in the country. Visitors are admitted Tuesdays and Fridays 9:30 A. M. to 11:30 A. M. and 1:30 to 3:30 P. M., the average number of prisoners being 700.

**Chicago Historical Society**, Dearborn avenue and Ontario street, three blocks north of the County Jail. The Museum holds material to preserve the history of the North Western states. It is the only building in the world of absolute fire proof construction. It is free to the public Mondays and Thursdays, 9 to 5.

**North Side Water Works**, Chicago avenue and Pine street, one mile north of Court House. Pumping 36,000,000 gallons a day.

**Lincoln Park** is north three miles, has 320 acres. By North Side Limits Car it takes twenty-five minutes. \$200,000 are spent yearly for its maintenance and buildings. The Academy of Science was founded in 1857. The cost of present building was \$100,000. It contains 50,000 specimens. Admission is always free. Library of references has 7,000 volumes and free lectures in July and August. The Palm House has a fine collection of tropical plants. There are animal houses for monkeys, kangaroos, parrots, snakes, etc., outside cages for eagles and birds, pits for brown, grizzly and polar bears, cages for fine specimens of lions, tigers, leopards; pits for foxes, badgers, raccoons; yards for deer, the wapiti, buffaloes, elephants, dogs, etc. Besides there are refectory, boat houses, fresh air fund building, flowers, foliage, lakes, bridges, fountains, drives, walks, esplanade, mall, tennis courts, base ball grounds, lagoons and paved beach, statues of Lincoln, Grant, Franklin, Linne, Schiller, La Salle, Anderson, Shakespeare; Alarm Signal of Peace, and Beethoven. The Electric Fountain plays Tuesdays and Fridays in the summer, throws water 100 feet high and is illuminated with fifteen electric colored lights of 8,000 candle power.

**The Ferris Wheel** of World's Fair fame, is two blocks west of the north end of Lincoln Park.

**Lake Shore Drive** is one-quarter mile south with many fine residences and Sheridan Road is north of Lincoln Park.

**Newberry Library** is on Clark street and facing Washington square, one mile north. It is rich in all works of references particularly so in Genealogy. The Medical Department is second only to the Surgeon Generals at Washington. It is hoped in two years to eclipse this. It contains up to date 31,126 volumes, 25,900 pamphlets, 57,026 books and pamphlets.

A large number of sets of periodical literature forms a strong feature in this collection and Gynæcology and Obstetrics are well represented.

The above number also includes the "Senn Collections," consisting of 9,063 volumes and 15,258 pamphlets, embracing two libraries.

1. The Dr. Baum Library, famous for its surgical works from the Middle Ages to our own time, and

2. The Du Bois Raymond Library consisting chiefly of Physiological works.

450 periodicals are kept on file.

Chicago has large private libraries of Physicians and Surgeons; Dr. N. Senn, Dr. C. Fenger, Dr. R. N. Isham, Dr. J. B. Hamilt on, Dr N. S. Davis, Dr. J. B. Murphy.

## SOUTH SIDE.

The value of the land on the South Side from the river to 12th street, which is two-thirds of a mile wide by one and one-third miles long is \$420,332,590. The value of improvements is \$102,936,500.

**South Water Street** is interesting because most of the produce is here handled.

**Rush Street Bridge**, foot of Michigan avenue is a good place to see the shipping. Early any summer morning the larger boats of the Goodrich, Lake Superior and other lines may be seen here.

**Masonic Temple**, N. E. corner State and Randolph. See the court twenty stories high. It has fourteen elevators and is valued at \$2,804,960. The Public Library, S. W. corner Michigan avenue and Randolph street. Open from 9 A. M. to 9 P. M. There are 235,385 volumes and 44,069 unbound pamphlets. The home circulation of books is the largest of any library in the world, 1,346,131 volumes a year, or 4,620 a day. This beautiful building should be visited. It cost \$2,125,000 and has a capacity for 2,000,000 volumes.

**Marshall Field & Co.'s Retail Store**, State, Washington, Randolph and Wabash avenue. Value of building, \$3,888,600. Number of employees, 3,500 to 4,000. Annual sales ten to twelve and one half million dollars.

**Columbus Memorial Building**, S. E. corner State and Washington streets, fifteen stories high. Notice bronze and mosaic work. Value \$2,201,000.

**The John Crerar Library**, N. W. corner Wabash avenue and Washington street, sixth floor. Scope—A free public reference library of scientific literature. The special field is the natural, the physical, and the social sciences with their applications. Number of volumes, 43,000. Periodicals in the reading rooms, 1,500. Building fund, \$100,000. The endowment fund, the income of which only is to be used is \$3,000,000. While medicines is included in the Newberry field, yet the John Crerar Library is especially rich in Zoology, Hygiene and Sanitary Engineering.

**Reliance Building**, S. W. corner State and Washington streets, fifteen stories high. White polished tile outside. Value, \$1,238,220.

**The Champlain**, N. W. corner State and Madison streets, fifteen stories high. Value, \$1,434,360.

**Palmer House**, S. E. corner State and Monroe streets. 750 rooms. See rotunda parlors and dining rooms. Value, \$5,053,300.

**Art Institute**, Michigan avenue, foot of Adams street. Paintings and statuary valued at \$1,000,000. Cost of building, \$800,000. There are 2,000 pupils in the Art School which is believed the greatest number of any Art School in the world. 600,000 people visit the Institute annually. Free Wednesdays and Saturdays, 9 to 5. Sundays, 1 to 5. Other days, 9 to 5, admission 25 cents.

The Tower of Montgomery Ward & Co. building Michigan avenue and Madison street, is 394 feet high.

**Chicago Athletic Association**, 124 to 126 Michigan avenue. The basement has bowling alleys, 1st floor cashier, Turkish baths and swimming pool; 2nd floor, lounging, billiard and grill rooms; 3rd floor, offices, library, barber shop and lockers; 4th and 5th floors, gymnasiums 6th and 7th floors, bachelor apartments, 8th floor, dining room; 9th floor, racket and tennis courts. Number of members, 2,100. Cost of building, etc., \$750,000. Largest club in the United States. Visiting card from any member admits.

**Lake Front Park.** One mile along the lake front from Randolph street, south, contains 211 acres. The statue of Logan is here seen.

**The Auditorium Building** includes hotel, theatre and tower. Valuation, \$4,002,830. The hotel has over one thousand rooms. See the offices, parlors, banquet hall and annex. It is eleven stories high. The theatre seats over 6,000 people and is lighted by 5,500 incandescent electric lights. It has one of the largest organs in the world. The stage is 98 feet wide and 69 feet deep. It is the home of the Thomas Chicago Orchestra of about 85 members. Its tower is eighteen stories high and for 25 cents a fine view of the city can be had. In this tower is the government weather bureau.

**The large Dry Goods and Department Stores** between Randolph and Van Buren streets on State street are interesting. A walk back on Wabash avenue shows many nice stores of various trades. Dearborn street has many high and elegant office buildings. The Board of Trade, La Salle street and Jackson boulevard, should not be neglected. Visitors are admitted free to the galleries. The Illinois Trust and Savings Bank across the street is very interesting. Ushers will show visitors through the Safety deposits vaults. La Salle street has many noted sky scrapers. The Young Men's Christian Association is No. 155. The new \$5,000,000 Post Office, Jackson boulevard, Adams, Dearborn and Clark streets will be 196 feet high and to top of dome 296 feet. The Great Northern Hotel and Theatre are opposite. A large part of the wholesale district is between Fifth avenue and the river.

**Jackson Park**, seven miles south: take I. C. R. R., time of transit, twenty minutes: or South Side Elevated, forty minutes. The park contains 586 acres and was the World's Fair site. The Field Columbian Museum is here located. It is the largest museum in the United States, and will repay at least one day's visit. It is free Saturdays and Sundays, other days admission, 25 cents.

**Midway Plaisance** contains eighty acres and connects Jackson and Washington Parks.

**Washington Park**, six miles south, contains 371 acres. It is one mile west of Jackson Park. Can be reached from downtown by Cottage Grove avenue cars, time 45 minutes. Its attractions are the Landscape Gardening Meadow of 100 acres, picturesquely distributed waters of thirteen acres, conservatory, stables, etc.

**University of Chicago.** Midway Plaisance, 57th street, Ellis and Lexington avenues. The value of the buildings, grounds and endowments is over \$11,000,000, it has 2,500 students and is open the entire year. Young women receive the same advantages as men. It has a press of ten Journals and a university extension to 50,000 members. It also maintains a college for 300 teachers.

**The Union Stock Yards** are four miles south-west of the business district, and is best reached by Wentworth avenue car. Time taken to reach the yards, 35 minutes. With 200 acres devoted to yardage alone, twenty miles of streets, twenty miles of water troughs, fifty miles of feeding troughs, seventy-five miles of drainage and water pipes and a capacity of caring daily for 125,000 hogs, 20,000 cattle and 15,000 sheep, something of the activity which prevails will impress itself. The various plants are estimated as worth over \$20,000,000, with a capital of \$50,000,000, and the number of employees about 25,000 with an annual wage of about \$20,000,000. Inquire for and go to Armour & Co.'s Packing House, which is the largest of its kind in the world. At the office you will be furnished free a special guide to show you about.

**Armour & Co.** kill annually about 2,500,000 hogs, 1,250,000 cattle and 1,150,000 sheep. The firm owns glue, soap, felt, curled hair and fertilizer works, also a pepsin factory, in which are manufactured

products out of materials that formerly was considered waste. Doctors and druggists should see Armour's Extract of Red Bone Marrow, which in the various anemias or any disease characterized by a depraved condition of the blood acts as a stimulant to the formative processes increasing the production of hemoglobin and red corpuscles. It is reported to promote cell proliferation and supplies the new born cells with nutrition, causing them to proliferate in turn and restores the blood to the normal condition.

## THE WEST SIDE.

The big West Side is twenty-six miles long and eight miles wide. It is used for residences and manufacturies.

**Union Park**, two miles west is reached by the Madison street car and contains fifteen acres.

**Douglas Park**, four miles south west is reached by the Ogden avenue car, time thirty minutes. Its attractions are lakes, mineral wells, refectory, conservatory, winter garden, natatorium and a gymnasium.

**Garfield Park**, four miles west is reached by the Madison street car in thirty minutes. It contains 185 acres, a half mile bicycle track, peristyle, lakes, casino and three miles of walks and two of drives.

**Humboldt Park**, four miles west is reached by the Metropolitan Elevated, Humboldt branch, in twenty minutes. It contains 200 acres of woods, lawns, lakes, walks and drives. It has a large conservatory and refreshment pavillion.

**Cook County Hospital** and others. Several medical and dental colleges may be reached in twenty minutes by the Ogden avenue car to Harrison street. They and the morgue there may be seen.

**Jewish Community** of 40,000 is bounded by Canal, Halsted, 12th and 16th streets. Yiddish spoken and written. Religious services from sundown Friday to sundown Saturday. Synagogue Judd street. Yiddish theatre corner Jefferson and O'Brien streets.

**Hull House**. Halsted and Polk streets, Halsted street car, time twenty-five minutes. A social settlement directed by Jane Addams. Elevating, uplifting, educating by nurseries, kindergartens, schools, clubs, concerts, lectures, gymnasiums, kitchens, trades and bank, the twenty-three nationalities in that district is its purpose.

**Wheelmen, Equestrians and those who drive** will find delight in Chicago's fine roadways. The favored routes on the north side are Dearborn avenue, through Lincoln Park, Sheridan Drive, where one can go twelve miles to Evanston or twenty-seven and a half miles to Fort Sheridan. Side routes are west on Buena avenue one block and through beautiful Graceland Cemetery, west on Wilson avenue, through Sheridan Park. On return south of Lincoln Park follow close to the Lake passing the beautiful residences on the Lake Shore Drive. South Side. Michigan avenue boulevard and Grand boulevard, through Washington Park, Midway Plaisance to Jackson Park, which is seven miles south. Return by Drexel boulevard. West Side. Jackson boulevard to Ashland boulevard to 12th street boulevard across Ogden avenue viaduct through Douglas Park, then via Douglas Park boulevard to Garfield boulevard to Garfield Park, which is four miles west. Return through Washington boulevard to Union Park, via Ashland boulevard to Jackson boulevard and back to business district. Side route Garfield Park to Central Park boulevard to Humboldt Park.

**Colleges, Dispensaries, Hospitals and Sanitariums** are numerous. Go to any one of Chicago's 966 drug stores and ask for the Medical Directory. You will see the location of all and can there telephone to

ascertain what time important operations take place. Any visiting doctor is welcome and can inspect or witness operations.

**Theatres, Concerts and Places of Amusements** with their attractions and their prices are best found among their advertisements in the daily papers.

**Church Services** are printed every Sunday morning in all the papers. Board of Aldermen meet every Monday evening at the City Hall. The Drainage Canal cost \$33,000,000. It is thirty-one miles long, thirty-eight feet deep, with twenty-two feet of clean water flowing through it from Lake Michigan to the Mississippi River.

## DEPOTS.

**Union.**—Canal and Adams streets. Used by the following railroads: Pittsburg, Fort Wayne & Chicago; Chicago, Burlington & Quincy; Chicago & Alton; Chicago, St. Louis & Pittsburg; Chicago, Milwaukee & St. Paul.

**Dearborn Station.**—Dearborn and Polk streets. Used by the following railroads: Chicago & Eastern Illinois; Atchinson, Topeka & Santa Fe; Chicago & Grand Trunk; Erie; Chicago, Indianapolis & Louisville; The Wabash.

**Rock Island.**—Sherman and Van Buren streets. Used by the following railroads: Lake Shore & Michigan Southern; Chicago, Rock Island & Pacific; New York, Chicago & St. Louis.

**Central.**—Lake Front and Twelfth street. Used by the following railroads: Michigan Central; Illinois Central; Cleveland, Cincinnati, Chicago & St. Louis; Wisconsin Central; Pere Marquette.

**Chicago and North Western.**—Wells and Kinzie Streets. Used exclusively by the Chicago & North Western Railway.

**Grand Central.**—Fifth avenue and Harrison street. Used by the following railroads: Baltimore & Ohio; Chicago & Great Western.

These railroad companies in six years have elevated over 200 miles of tracks and depressed more than fifty-seven miles thus doing away with nearly 200 grade crossings. The work done and to be done in Chicago costs \$17,000,000.

## SYSTEMS IN BUSINESS.

Systems in business are best illustrated at the Laboratory of Stearns & White Company, Nos. 181 to 189 Chestnut Street. Take the Northwestern Elevated at any of the loop stations, get off at Chicago avenue, walk north one hundred steps. Time from loop, three minutes. Visitors are always welcome. See the arrangement of stock. In the basement, bottles in cases, boxes for packing, crude drugs in packages, liquids in barrels, have each their marked place, numbered 1 to 1,000. All the fixtures, such as boilers, engines, engineer's tools, have their fixed place, marked F1 and upwards. On the first floor all manufactured stock is from 1,000 to 2,000. All "outside" goods, or crude materials, or those used for packages, stationery, etc., 01,000 to 2,000. All fixtures F1,000 to 2,000. On the second floor everything is numbered 2,000 to 3,000. On the third or order floor, 3,000 to 4,000. The price list number locates the goods. This space is marked by a tin device into which is slipped a printed card with number and name; this is protected by a mica slide. In filling orders the order sheet giving the number and name affords a double check then and there by number and name and a verification by name and number making mistakes next to impossible. Each label has its separate drawer which is marked L and the same number as the goods. Everything must come back to its numbered

marked place, because there is no other for it. A shelf filled with chemicals in various kinds of packages may look more disorderly than one filled with gallon bottles, yet each package is under its marked numbered place and there is no disorder anywhere. However rushed, there is no confusion. Everyone is at perfect ease and knows what he or she must do and how to do it, knowing that a way has been provided to make two thinking checks that prevents all errors. On the fourth floor, while all fixed stocks are numbered 4,000 to 5,000, all medicines in the process of making are marked on blackboards. On the fifth floor all are numbered 5,000 to 6,000. A thousand numbers to each floor in manufactured goods. O for "Outside" goods, F for "Fixtures."

The original office systems are as interesting as the copyrighted stock systems. The buying cards, classified and arranged, show each article purchased, where kept in the building, kind, date, quantity, from whom bought, price, contracts, quotations, criticisms. A complete history of each article is on its card, which makes intelligent buying easy compared with old ways. See the Bills Payable forms, where each incoming bill is alphabetically, dictionaryly placed according to date of purchase, with the number that has been given that bill above a line and the amount of that bill below the line. These amounts added, with the discounts subtracted, show all owed at any time. The check number which pays this bill is recorded in line headed Paid, so no receipts are required. Any bill, however old, can be quickly found from the Bills Payable book and its number. The Order Sheet gives credit, date sold, terms, billed by, examined by, register date, salesman's number, sold to, town and state, shipped by, salesman, binder folio, date billed, ledger folio, case file folio, shippers' check, inspector's check, put up by, quantity, list number, name, price, our goods, outside goods, extensions, making on one sheet an order sheet with all the check marks by fifteen different people, which when bound in its file becomes a page in a day book which is posted on the ledger. Small shortages are prevented by little articles being packed in paper bags printed in large type "This bag contains small packages. Please do not overlook them in unpacking." Each customer—also those whom we wish to sell—have their own case file. These are kept in oak boxes and are easily found by markers giving state, town and name. They have on one side the business, address, date, salesman, credit, average, how often, population, ledger, railroad lines, price list sent, samples sent, advertising sent, letters, calls, responds, specialties sold, complaints, remarks, special formulas, prices quoted. On the other side prices charged, part two. Part three, miscellaneous. By referring to this file each customer's case is understood and his wants properly filled.

All the bookkeeping is done by an original card system, a marvel of simplicity and accuracy. The Estimates, Contracts, and Formulas are also on cards. Each is handled separately by those detailed to attend to them. Any can be found in a moment. All must be seen to be appreciated.

## SPECIAL PREPARATIONS.

# Benzomol

1022

BENZOLIC AC. THYMOL MENTHOL EUCALYPTOL BORIC AC.  
BAPTISIA TINCT. METHYL SALICYL. FORMALDEHYDE

An antiseptic and antifermentative solution of undoubted value.

As a spray in any inflammation or unhealthy condition of the nose, throat and ear, or any abraded or mucous surface. As a gargle in sore throat. As an injection in gonorrhoea, leucorrhoea, and kindred troubles. As a wash in inflamed or ill-conditioned wounds. Internally a safe and agreeable remedy in fermentative or catarrhal diarrhoea, and in diphtheria, scarlet fever, etc. An excellent deodorizer and disinfectant in the sick room and for the use of physicians as a wash for the hands and instruments during operations or obstetrical work.

In such an agent, combining the greatest germicidal power with perfectly non-poisonous and non-irritating properties. It will not stain the clothing and is intended for both internal and external use.

Benzomol contains the following ingredients:

**Benzolic Acid.**—Obtained by dry distillation from gum benzoin, a drug long celebrated for its healing properties in the treatment of wounds.

**Thymol.** One of the constituents of common garden thyme. It has an agreeable aromatic odor and is among the most powerful of vegetable antiseptics. It is superior to carbolic acid as an antiseptic, as it is not poisonous.

**Menthol.** A crystalline substance obtained from oil of peppermint. It is destructive to all bacteria and will cure ringworm and many parasitic skin diseases, and is a superior local application for burns and scalds. A saturated solution of menthol will relieve the itching of hives, and pruritis of the vulva and anus.

**Eucalyptol.** From the oil of Eucalyptus, a product of the blue gum tree of Tasmania. It is an efficient deodorizer and is used as a dressing for cancerous and other foul ulcers, substituting a pleasant for an offensive smell.

**Boric Acid.** Obtained from the vapors which issue from certain volcanoes in Italy and some other parts of the world. It has proved especially valuable in treating inflammations of the eye, ear, nose and throat, as a local application, and in diseases of the mucous membranes generally.

**Baptisia Tinctoria.** A plant growing in the United States and Canada. It has long been known as an antiseptic in typhoid and adynamic fevers, with a tendency to putrescence, and as a local remedy for ulcers tending to become gangrenous.

**Methyl Salicylate.** From oil of wintergreen, possesses in a high degree the power of preventing putrefaction when added to liquids.

**Formaldehyde.** Known as an antiseptic and tissue hardener.
